

ABSTRACT OF THE DISCLOSURE

A new and distinct cultivar of an *Anthurium andreanum* plant named
'Anthbnem', as described and illustrated, and particular characterized by the combined
5 features of compact plant growth and early and very rich flowering; mini-type pot
plant, maximum growth to an average of 40 cm; long and erect peduncle, flowers held
well above the foliage; full plant habit due to shoot formation, lush plant due to straight
but flexible flower and leaf petioles; dark green leaves, compact, durable with light
green primary veins; red and very durable flowers, lastingness of the inflorescence up
10 to one year; and large amount of flowers in relation to the amount of leaves, resulting in
an excellent leaf to flower size ratio.
